September 10, 2021

The Honorable Patty Murray  
Chairwoman, Senate Committee on Health, Education, Labor and Pensions  
428 Senate Dirksen Office Building  
Washington, D.C. 20510

The Honorable Richard Burr  
Ranking Member, Senate Committee on Health, Education, Labor and Pensions  
428 Senate Dirksen Office Building  
Washington, D.C. 20510

Dear Chairwoman Murray and Ranking Member Burr:

The Mental Health Liaison Group (MHLG), a coalition of national organizations representing consumers, families, mental health and addiction providers, advocates and other stakeholders committed to strengthening access to high-quality mental and behavioral health care, is writing to express our strong support for S.484 the Moms Matter Act. The Moms Matter Act, led by Senator Gillibrand and Representatives Blunt Rochester (D-DE) and Katko (R-NY) in the House, will make necessary investments to support moms with and at risk of maternal mental health conditions, with a focus on mothers of color; close racial health disparities; and diversify the maternal behavioral health care workforce. We request that the bill be brought forward for consideration in the upcoming months.

Maternal mental health conditions are serious illnesses that impact as many as 1 in 5 mothers\(^{1}\). Mothers of color however suffer a disproportionate burden of these conditions in part due to higher degrees of stress\(^{2}\) and lower levels of economic stability\(^{3}\). Maternal mental health conditions are most acute for low-income and minority families. More than half of poor infants live with a mother who has some level of depressive symptoms\(^{4}\), and suicidal ideation and intentional self-harm rose significantly for Black birthing people during and after pregnancy in the decade from 2006-2017\(^{5}\). Black mothers are also less likely to receive treatment for maternal mental health conditions\(^{6}\).

These mental illnesses harm not only mothers but their families and communities. Maternal mental health conditions impair mother-infant interactions and cause negative behavioral, cognitive, and emotional impacts on the infant\(^{7}\). Untreated maternal depression during pregnancy also leads to higher risks of preterm and low birth weight delivery and infant mortality\(^{8}\). Finally, suicide and overdose caused by a maternal mental health condition are the leading causes of death for new mothers\(^{9}\). Particularly during pandemic recovery, maternal mental health conditions must be prioritized in maternal health, mental health, and health equity legislation.

This timely bipartisan bill provides critical investments in programs to support underserved moms and improve health care delivery by:

1. Investing in community-based programs that provide culturally congruent mental and behavioral health treatments and support under SAMHSA, and
2. Funding programs to grow and diversify the maternal mental health care workforce and expand access to culturally congruent care under HRSA.

The Moms Matter Act offers policy solutions to longstanding income, race, and ethnicity-based gaps in access and care. As it stands, Black and Latina women are less likely than white women to initiate or continue treatment or refill a prescription for a maternal mental health condition\(^\text{10}\). In part due to these barriers, Black women are three times more likely to have a maternal death than white women in the United States\(^\text{11}\). The Surgeon General’s recent report concludes that solutions lie in “tailoring services to the specific needs of these groups [to] improve utilization and outcomes.”\(^\text{12}\) The Moms Matter Act actively implements these recommendations in the maternal behavioral health care field.

As millions of new moms struggle with postpartum depression, substance use, and other maternal mental health conditions, our responding health care system must account for the diverse backgrounds and needs of patients. The Moms Matter Act will strengthen existing systems by supplying funding to grow workforces and pioneer effective maternity care models. To protect these mothers and future generations, we urge the Senate HELP Committee to bring S.484 the Moms Matter Act forward for consideration this Fall.

Sincerely,

2020 Mom
